## No Commercial Use Policy

The U.S. Department of Energy (DOE) is a federal agency working in the public interest. Published information from the DOE Solid-State Lighting (SSL) Program, including test reports, technical information, and summaries, is intended solely for the benefit of the public, in order to help researchers, buyers, product specifiers, testing laboratories, energy experts, energy program managers, regulators, and others make informed choices and decisions about SSL products and related technologies. Such information may not be used in advertising, to promote a company's product or service, or to characterize a competitor's product or service. This policy precludes any commercial use of any DOE Solid-State Lighting Program published information in any form without the express written permission of the DOE.
